We also offer an extensive line of steel and recycled playgrounds that are sure to be the center of your space. *Please visit srpskyspan.com and srplayground.com for more information.*

Warranty and Options

LIMITED WARRANTY

All SRP’s thermo-plastic, PVC coated products have a limited warranty to the original purchaser of the products to be free of corrosion on seats and tops that results in bare metal exposure for a period of 5 years after the date of purchase, excluding any corrosion that may be the result of vandalism or intentional stripping of any of the coating.

SRP’s site amenities structural supports for tables and benches have a limited warranty to the original purchaser to be free of rust outs that would compromise structural integrity for a period of 5 years after date of purchase. Surface rust or cosmetic paint deterioration is excluded.

SRP site amenity products not listed above have a one year warranty on workmanship and materials when installed and maintained properly. Items not covered under warranty include acts of God, normal aging, weathering, and public abuse or vandalism. Claims for defects must be accompanied by copies of the original invoice or invoice number. A one year limited warranty is offered on steel, recycled plastics, and wood site furnishings. Wood products are subject to weathering, cracking, splintering, and insects and are not covered in our one year limited warranty.

CANCELLATIONS AND RETURNS

Cancellations and returns must be approved by SRP and an authorization number, issued by the SRP Customer Care Department, must accompany the return. All returned items must be carefully packed and received in a condition that allows for easy identification and sale of product. A restocking fee of 25% will be applied to any returned item not in error of SRP. SRP may asses an additional handling fee of up to 15% if condition of returned item is in disarray or item is in a non-sellable state.

POWER COATING

The Limited Warranty for Powder Coating provides for the following after a five year exposure period when applied according to the recommendations listed on the product’s technical data sheet and appropriate surface preparation has been utilized.

- The coatings shall retain their original color with a ΔE of < 7.5 units for high chroma colors, (Yellows, Reds, Oranges, Etc.) and a ΔE of < 5.0 units for low chroma colors, when tested in accordance with ASTM D 2244.
- The coating shall retain a minimum of 50% of its original gloss level after washing, when tested in accordance with ASTM D 523.
- The coating shall exhibit chalking no worse than a numerical rating of 6, when evaluated in accordance with ASTM D 659-80.

TOP AND SEAT COATING OPTIONS

SRP Site Amenities is the only company in our industry that offers the two industry standard coatings for outdoor furniture and site amenities. **Plastisol**, the traditional coating, is a liquid PVC. Product is dipped in plastisol and

baked, creating a hardened surface. **Polyethylene**, a powder, is placed in a fluidized vat where the product is dipped and then baked. You may choose a plastisol or polyethylene coating for your SRP Site Amenities product.

All frames are coated with a highly durable polyester powder coat. Textured polyethylene is available for all products at additional cost. See below for a list of products that are only available in textured polyethylene.

- solid top tables
 - Plasti-Plank products
 - custom letter products
- trash receptacles
 - one piece benches
 - bike loops

PLASTISOL

SRP Site Amenities is the only company that puts a **90% gloss shine** on our plastisol products. Not only does our gloss enhance the overall look of our product, it also helps with UV protection. In addition to our 90% gloss shine, our plastisol products have a **smooth surface**. While our competitors’ products have a porous surface that is susceptible to stains and dirt build-up, SRP’s plastisol is completely smooth which acts as a stain repellent and helps prevent dirt build-up.

TEXTURED POLYETHYLENE

Traditionally, Polyethylene is very easily scratched and marred. Unfortunately, it is difficult to fix a scratched or marred surface on polyethylene. By using a **textured surface**, SRP has eliminated this problem! Our textured polyethylene coating helps hide the scratches and mars, while keeping the product looking better longer. Unlike Plastisol, polyethylene leaves **no drips** on the product.

WHAT’S THE DIFFERENCE?

	PLASTISOL	TEXTURED POLYETHYLENE
FEEL	Softer Feel	Harder Feel
THICKNESS	Approx. 1/4” Thick	Approx. 1/8” Thick
DRIPS	Very Possible	No
UV PROTECTION	Yes	Yes
APPLICATION	Outdoor/Indoor	Outdoor/Indoor
ANTI-FUNGUS	Yes	Yes
FINISH	High Gloss Shine	Textured Finish
